**Glow Plug
Service Kit**

Now available from Hitachi: Glow plug service kits consisting of the glow plug relay and the corresponding glow plugs for various BMW applications.

Benefit from the quality of our products and rely on original spare parts from Hitachi.

Whenever replacing a defective glow plug relay (often called a glow plug control unit), vehicle manufacturers such as BMW recommend to replace the glow plugs at the same time. In case only the relay is exchanged, an already malfunctioning glow plug may damage the new relay. Our new service kits, which feature the relay supplied together with the suitable glow plugs, allow you and the garage to save valuable time and avoid future problems.

The manufacturer's instructions must be observed when replacing the glow plug relay and the glow plugs.

The following sets are available now. Further sets for other vehicle applications will follow.

HÜCO No. 132300			
	Glow plug relay	BMW	12217798000
